Dear Mr. Reaves,

This is to acknowledge receipt of your email to the Public Service Commission of South Carolina. I am forwarding your email to our Clerk's Office for processing. Your email will become a part of Docket No. 2014-246-E and will be posted on our website under this docket.

Please let me know if you should require any additional information.

Sincerely,

Deborah Easterling
Administrative Coordinator

Subject: 2014-246 E: I Support Net Metering

Dear Public Service Commission Public Service Commission,

I strongly support net metering. Utility companies are monopolies and rooftop solar gives a consumers electricity choice and market competition. A thriving rooftop solar industry in the state will create a competitive energy market for the first time and will add more local jobs. Net metering allows me to self-generate electricity on my rooftop and consume this clean electricity I generate in my own home. It is extremely important for me to have the right to use the electricity produced on my own roof to meet my electrical demands and take control of my ever-increasing utility bill. Net metering will fairly credit rooftop solar customers for the excess energy they deliver back onto the grid. There are no hidden fees or taxes with net metering. A recent poll found that 73% of South Carolinians across party lines want to see more solar energy deployed in the state over other sources.

Sincerely,

adam reaves
